

# Jan Stolarek, PhD

Web: <https://jstolarek.github.io/>  
Email: [jan.stolarek@mailbox.org](mailto:jan.stolarek@mailbox.org)  
GitHub: <https://github.com/jstolarek>  
BitBucket: <https://bitbucket.org/jstolarek>

Polish citizen. Speaks English (fluent).

## Selected professional career

2022–to date	<p><b>Senior Haskell Developer and Architect</b> at BinarApps Sp. z o.o., Łódź, Poland</p> <ul style="list-style-type: none"><li>• design and development of distributed applications on Cardano blockchain, including smart contract implementation in Plutus (a Haskell EDSL)</li><li>• design and development of Midnight blockchain, leveraging Cardano as a trusted security layer</li></ul> <p><i>Technology:</i> Haskell, Cardano/Plutus</p>
2016–2021	<p><b>Research Associate</b> at Laboratory for Foundations of Computer Science, University of Edinburgh, UK</p> <ul style="list-style-type: none"><li>• development of a Haskell EDSL for language integrated queries with experimental support for provenance tracking</li><li>• Haskell implementation of slicing for a simple functional language with imperative features</li><li>• formalisation of a slicing algorithm using Coq proof assistant</li><li>• development and maintenance of Links programming language</li></ul> <p><i>Technology:</i> Haskell, OCaml, Coq</p>
2012–2016	<p><b>Lecturer</b> at the Institute of Information Technology, Lodz University of Technology, Poland</p> <ul style="list-style-type: none"><li>• design and implementation of Injective Type Families in GHC</li><li>• design and implementation of <code>singletons</code> library for promoting Haskell term-level functions to the type level using Template Haskell</li><li>• numerous Template Haskell improvements and fixes in GHC</li></ul> <p><i>Technology:</i> Haskell</p>
2013	<p><b>Intern</b> at Microsoft Research, Cambridge, UK</p> <ul style="list-style-type: none"><li>• implementation of new branchless PrimOps in GHC (Glasgow Haskell Compiler)</li><li>• improving optimisations performed by the Cmm pipeline in GHC</li></ul> <p><i>Technology:</i> Haskell</p>

## Education

2012	<b>PhD</b> in Computer Science, Lodz University of Technology (Poland) <i>Thesis:</i> Orthogonal wavelet synthesis based on signal processing outcome.
2008	<b>MEng</b> in Computer Science, Lodz University of Technology (Poland) <i>Thesis:</i> User identification based on fingerprint analysis.

## Professional skills

<b>Programming</b>	<i>Expert knowledge:</i> Haskell with GHC extensions, Plutus <i>Advanced knowledge:</i> Bash <i>Intermediate knowledge:</i> Coq, OCaml, C
<b>Tools</b>	<i>Expert knowledge:</i> git <i>Intermediate knowledge:</i> Emacs, L <sup>A</sup> T <sub>E</sub> X
<b>OSes</b>	<i>Expert knowledge:</i> Linux (Debian)

## Selected peer-reviewed papers

2022	F. Emrich, J. Stolarek, J. Cheney, and S. Lindley. Constraint-Based Type Inference for FreezeML. <i>Proceedings of the ACM on Programming Languages</i> , 6(ICFP):570–595, 2022
2020	F. Emrich, S. Lindley, J. Stolarek, J. Cheney, and J. Coates. FreezeML: Complete and Easy Type Inference for First-Class Polymorphism. In <i>Proceedings of the 41st ACM SIGPLAN Conference on Programming Language Design and Implementation (PLDI '20)</i> , 2020
2019	J. Stolarek and J. Cheney. Verified Self-Explaining Computation. In <i>13th International Conference on Mathematics of Program Construction (MPC '19)</i> , 2019
2018	J. Stolarek and J. Cheney. Language-integrated provenance in Haskell. <i>The Art, Science, and Engineering of Programming</i> , 2(3), 2018
2017	W. Ricciotti, J. Stolarek, R. Perera and J. Cheney. Imperative Functional Programs that Explain their Work. <i>Proceedings of the ACM on Programming Languages</i> , 1(ICFP):Article 14, 2017
2015	J. Stolarek, S. Peyton Jones, and R. A. Eisenberg. Injective Type Families for Haskell. In <i>Haskell Symposium 2015</i> , volume 50, pages 118–128, December 2015
